

# The Ryan White Program Model of Care: Team Based, Patient-Centered

The Ryan White HIV/AIDS Program (RWHAP) supports comprehensive care and services critical to managing HIV infection in the U.S. By improving health outcomes for people with HIV, Ryan White also reduces the spread of HIV within the community.

## Provides Comprehensive HIV Primary Care through a Team-based, Patient-Centered Model

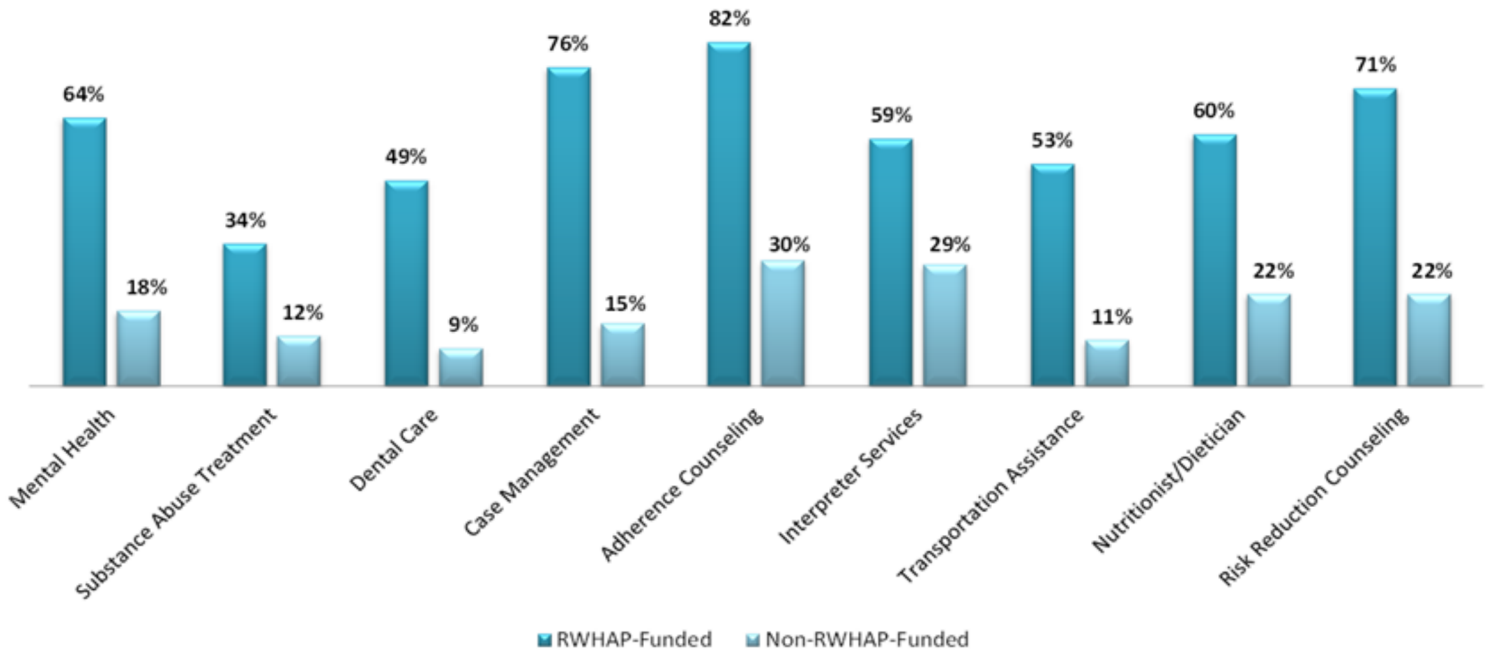

Harnesses the power of a multi-disciplinary team

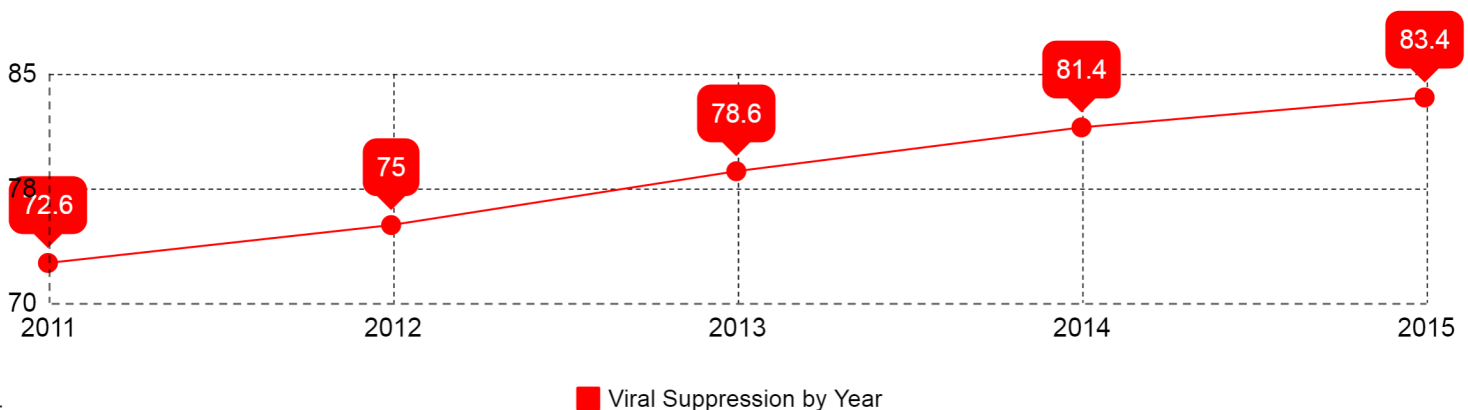

Patient-Centered to maximize outcomes

## Ryan White Program-Funded Clinics Provide More Comprehensive Services than Non-Ryan White Program-Funded Clinics

## The Ryan White Model of Care Achieves Exceptional Outcomes

When virally suppressed, individuals with HIV are healthier and their risk of transmitting the virus drops to near zero.

■ Viral Suppression by Year
