The bipartisan HIV Epidemic Loan-Repayment Program (HELP) Act will address the urgent need to support a strong and effective HIV clinical and dental workforce by authorizing a new loan-repayment program specific to HIV clinical providers. HIV clinicians shortages are already widening in parts of the country.

Nationally, more than 38,000 people are newly diagnosed with HIV each year, and of the 1.1 million people living with HIV, only half are in regular care and benefiting from treatment. Treating people with HIV rapidly and effectively to reach sustained viral suppression is important for people with HIV to stay healthy and to prevent new HIV transmissions.

From AIDSVu: HIV Prevalence Rate Ratios by Race/Ethnicity 2018

- The rate of Black males living with an HIV diagnosis is 6.5 times that of White males.
- The rate of Hispanic/Latino males living with an HIV diagnosis is 2.5 times that of White males.
- The rate of Black females living with an HIV diagnosis is 13.9 times that of White females.
- The rate of Hispanic/Latina females living with an HIV diagnosis is 3.6 times that of White females.

The initiative will be expanded nationally as funding allows.

The new loan repayment program would offer up to $250,000 in loan repayment to HIV clinicians and dentists for up to five years of service providing HIV-related treatment in Health Professional Shortage Areas (HPSAs), Ryan White-funded clinical sites or a service area that meet criteria to be defined by the Health Resources and Services Administration’s (HRSA) HIV/AIDS Bureau.

A HPSA is a geographic area, population group, or health care facility that HRSA has designated as having a shortage of health professionals. These areas have a shortage of primary or dental care providers.

HRSA'S Ryan White HIV/AIDS Program (RWHAP) supports direct health care and support services for over half a million people with HIV — approximately half of all people with diagnosed HIV in the United States, of which 73.4% of the clients are members of ethnic minority populations.

16,425 clients received services from North Carolina's Ryan White Program in 2018
